

Coil Configuration for Twin Tubes

Coil Configuration

Which connection variant is the right one is usually determined by the construction of the machine/appliance in which the emitters are used.

- Typ B (single sided connection)

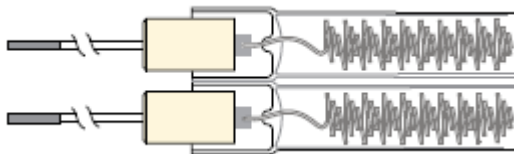

- Typ C (double sided connection)

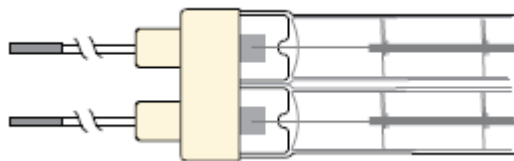

Type of coil

- TF (Star coil, Quartz tungsten, up to 1500°C, fast medium wave)

- TS (Filament, Quartz Halogen, short wave)

- TM (Spiral, Quartz Standard, Medium Wave)
